DESCRIPTION

Model 1320 is a high capacity single point load cell designed for direct mounting of low profile, high capacity weighing platforms up to 1200 x 1200mm.

Its large platform size simplifies the construction of floor scales, weigh bars, hanging scales and other types of weighing machines with a capacity up to 2000kg.

All load cells are individually adjusted to eliminate corner errors, tested and calibrated to meet OIML specifications.

A special humidity resistant coating assures long term reliability.

The two additional sense wires feed back the voltage reaching the load cell. Complete compensation of changes in lead resistance due to temperature change and/or cable extension, is achieved by feeding this voltage into the appropriate electronics.

APPLICATIONS

- Very large platform scales
- Hanging scales
- Check weighing
